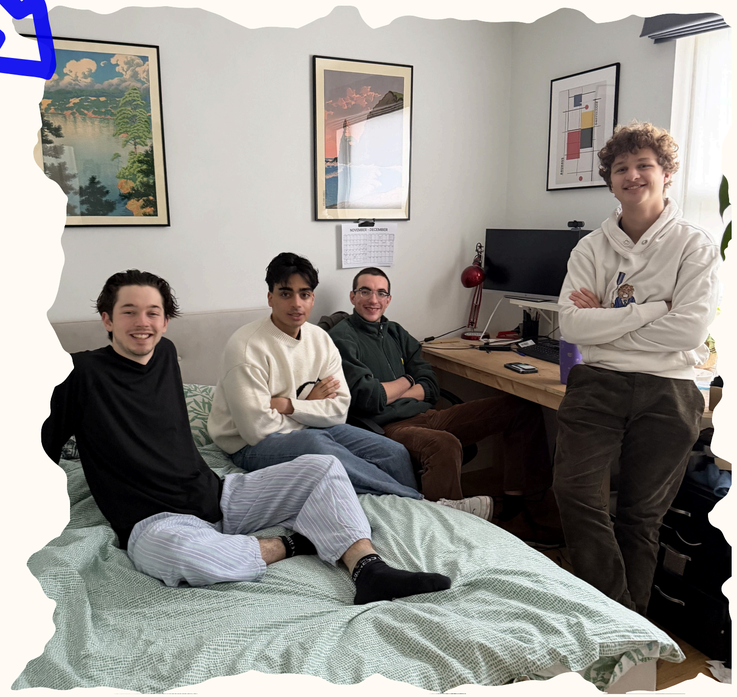
A more permanent solution to melatonin

Dec 2025

A Personal Frustration

Having lived together for years, the 4 of us all suffered from the same thing: **A bad night's sleep.**



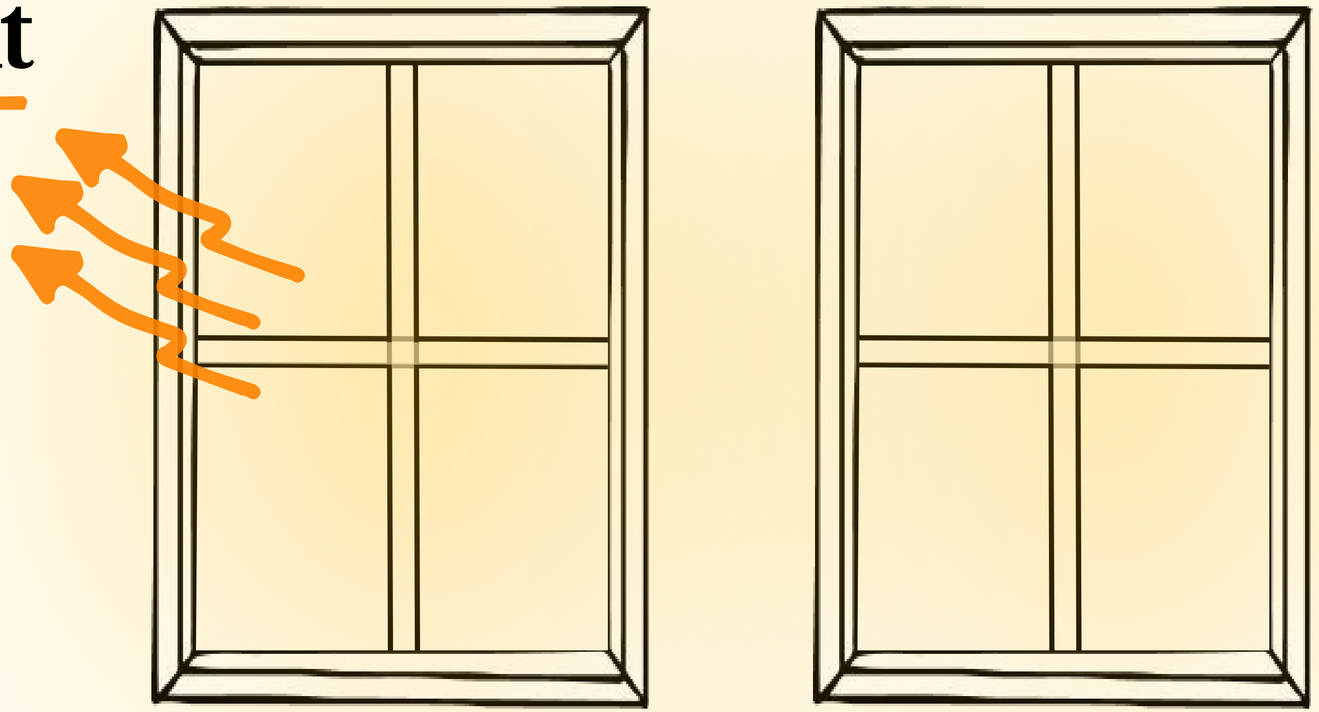
Our Dream...

...make every night's sleep truly count

Our Dream...

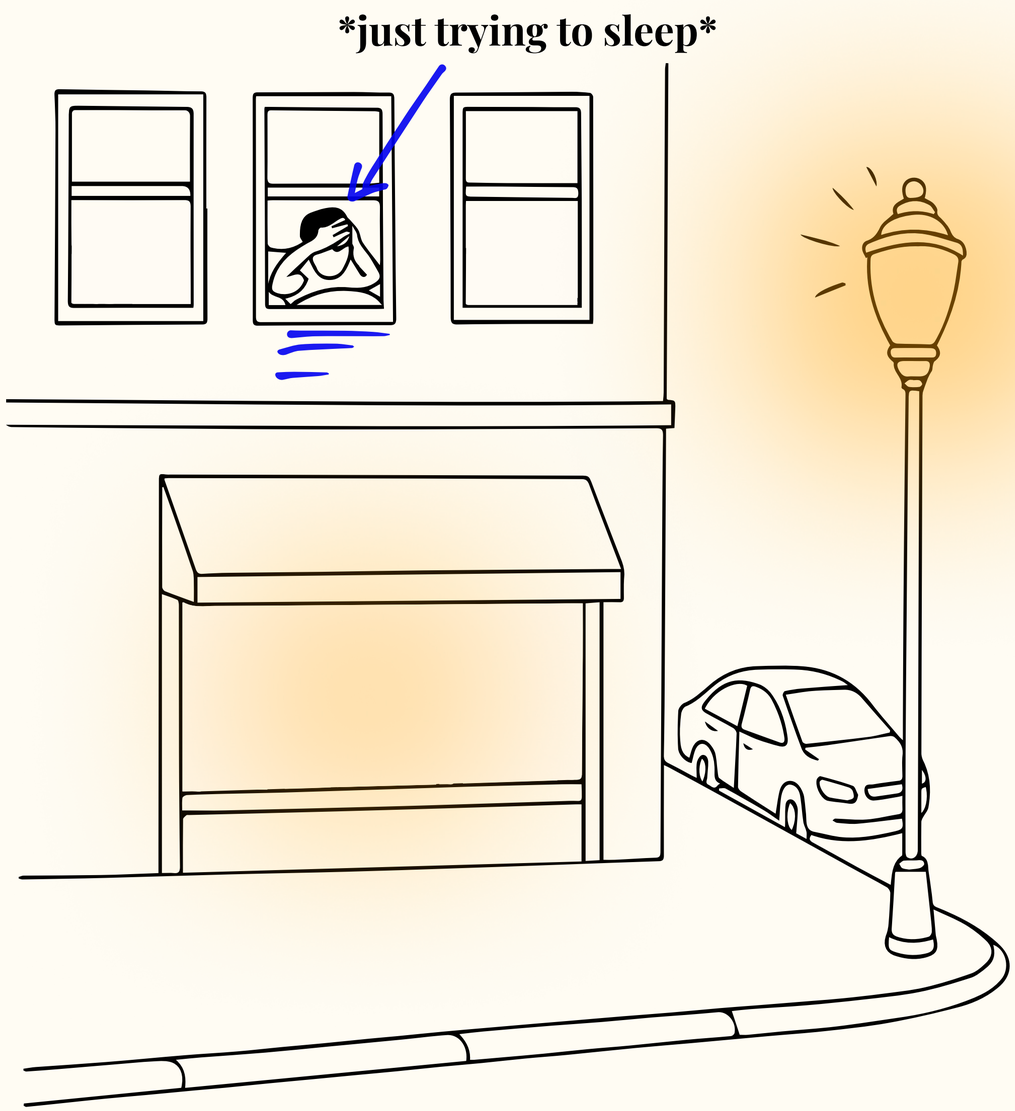
...but what is ruining our sleep?

Light



Prolific

In our survey to 268 respondents...



71% complained about lights shining into their bedrooms

68% have already tried eye-masks or earplugs

CNN health

Light pollution links to **higher rates of mood disorders**

HOUSE OF LORDS

Light is now classed as a “**neglected pollutant**”

BBC

Around **83% of the world’s population** live under light polluted skies

CNN health

Light pollution links to **higher rates of mood disorders**

HOUSE OF LORDS

Light is now classed as a “**neglected pollutant**”

BBC

Around **83% of the world’s population** live under light polluted skies

CNN health

Light pollution links to **higher rates of mood disorders**

HOUSE OF LORDS

Light is now classed as a “**neglected pollutant**”

BBC

Around **83% of the world’s population** live under light polluted skies

Even dim light while you sleep **can reduce your lifespan.**

How do we make every night's sleep truly count?

Our Dream...

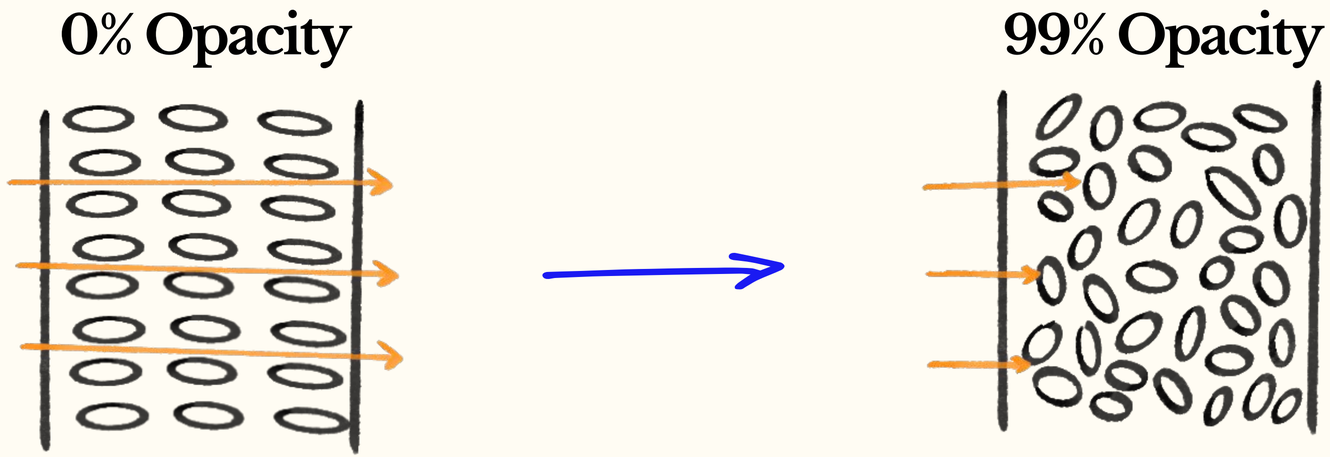
What is the tech?

We use an **electrochromic film** to change the window's opacity.



A small battery can power a window for **100 days**.

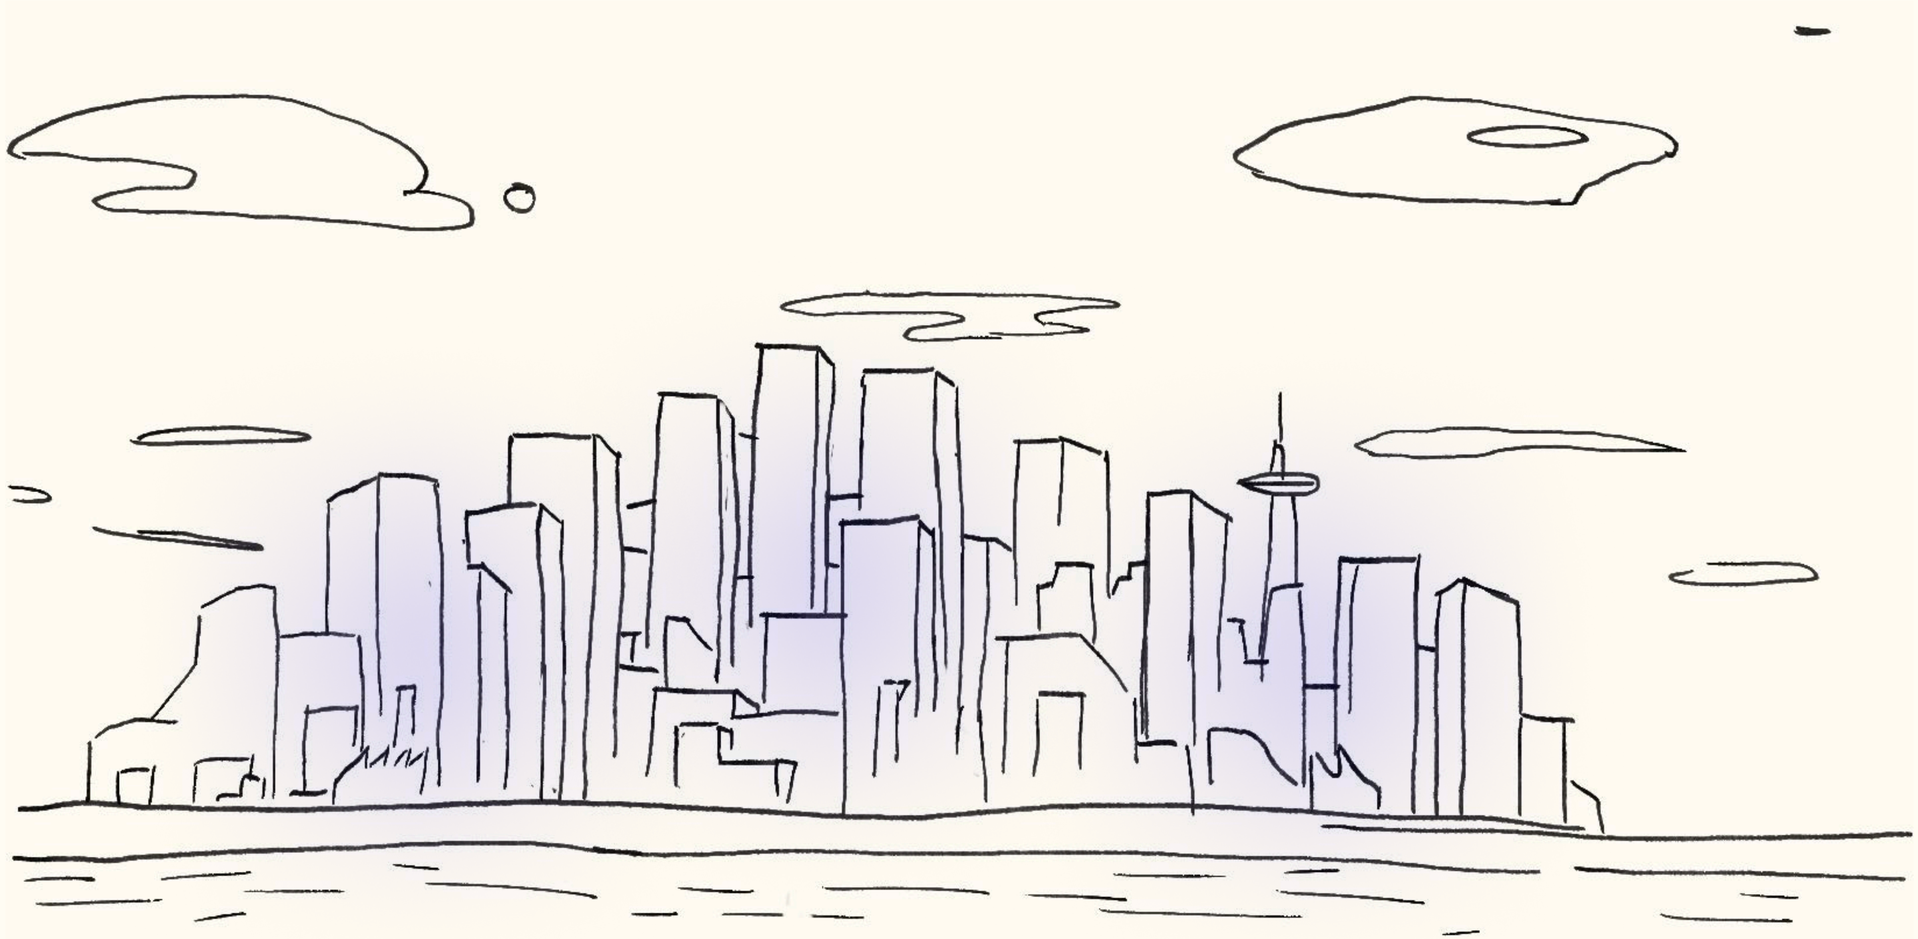
It’s already being used **commercially in cars & airplanes**

Who are we targeting?

Eventually everyone!
But we start with...

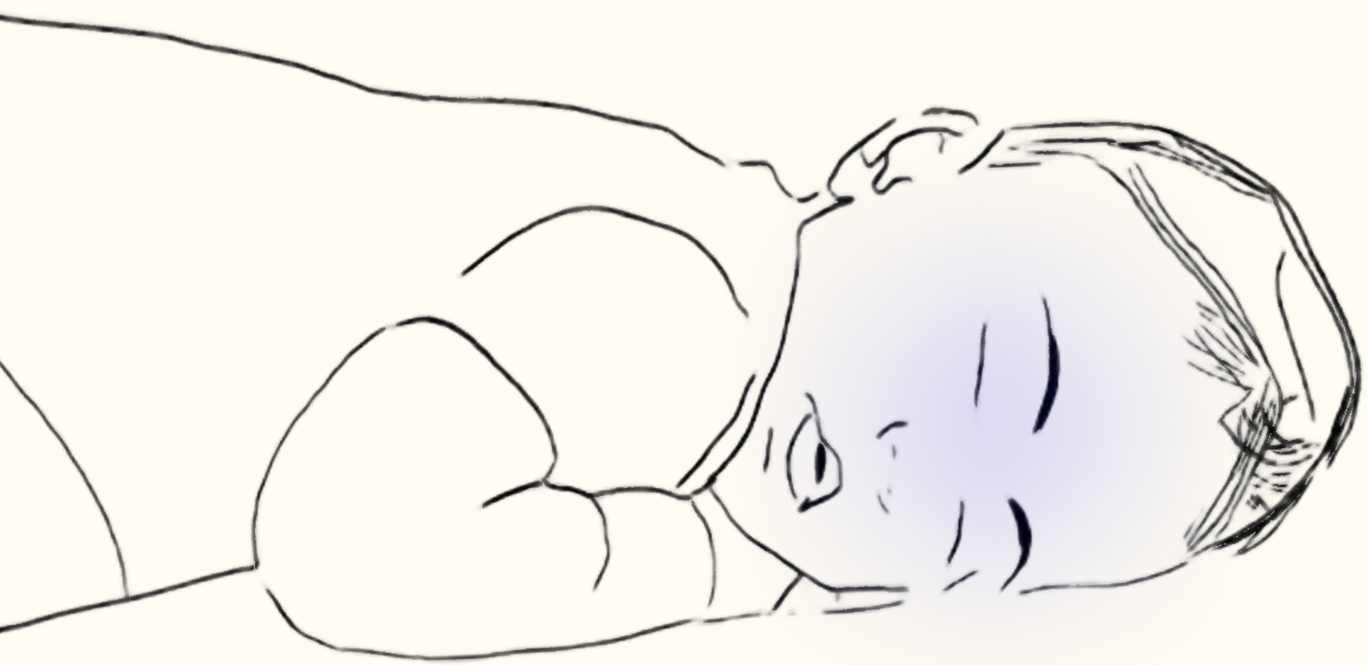
Renters in **big cities**

£864M SAM (UK)



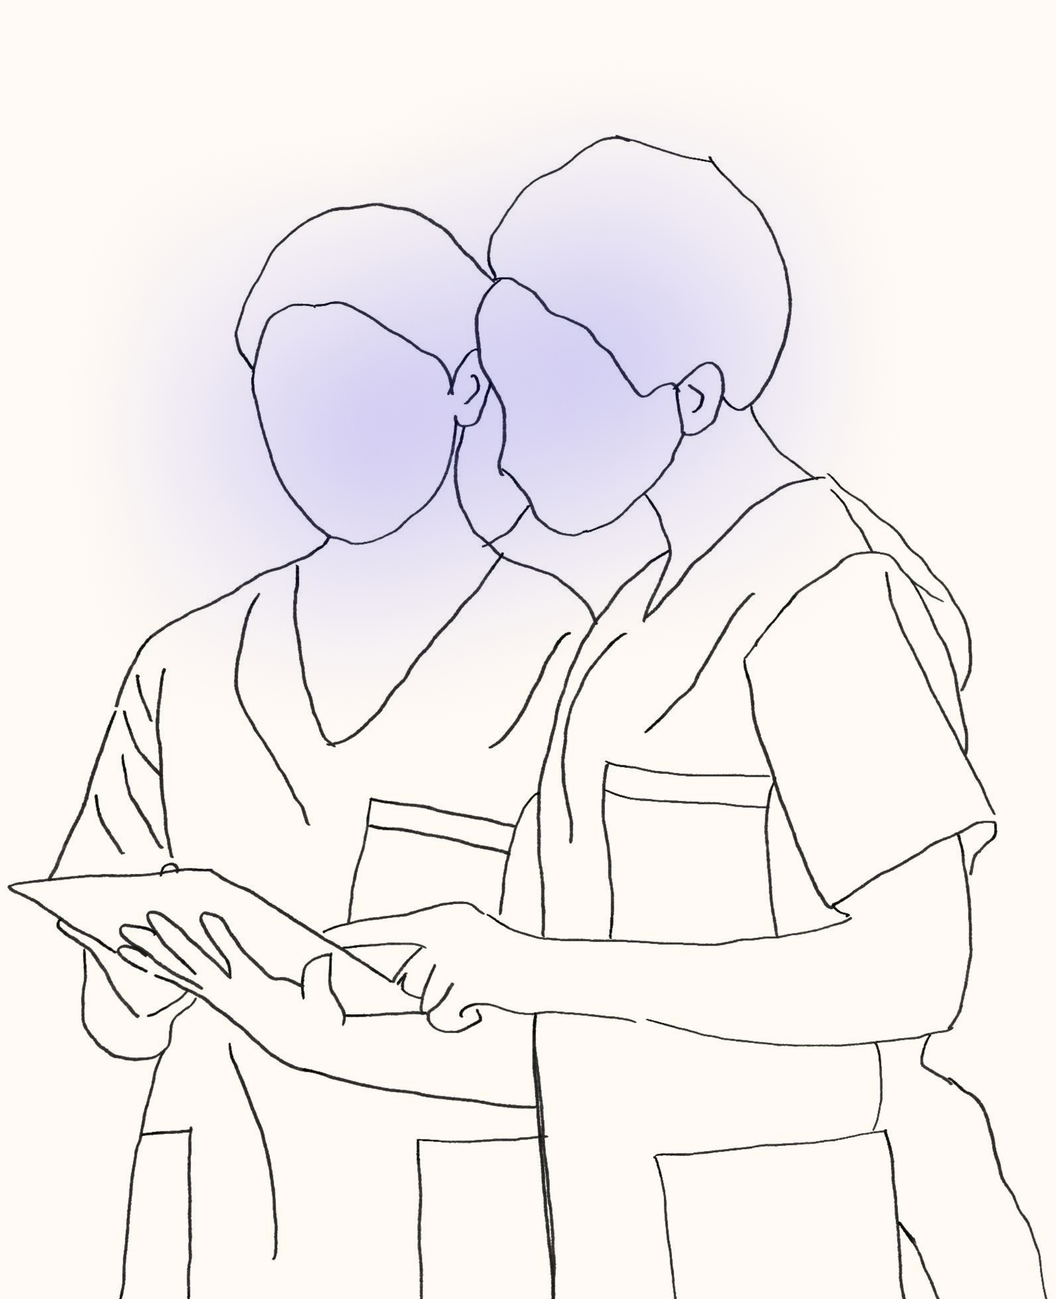
Parents of **babies & toddlers**

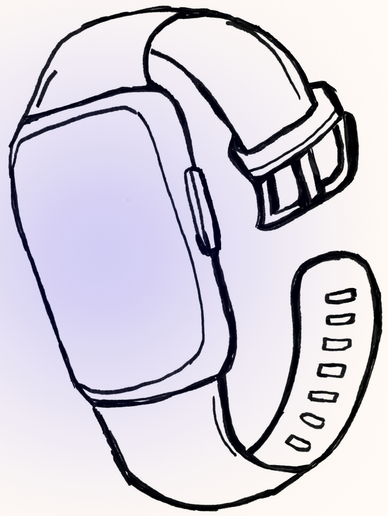
£205M SAM (UK)



Night shift workers

£224M SAM (UK)





Health conscious
consumers

£76.8M SAM (UK)

What have they tried?

Permanent Curtains

BlocOut, blinds2go, bilby, IKEA, BlindsbyPost, NORDIC KNOTS, amazonbasics, Valquid

- ✕ Too many gaps for light to pass through
- ✕ Permanent fixtures
- ✕ Difficult to install

Smart Glass Suppliers

THE GLASS OFFICE PEOPLE, Smart Privacy Glass XANDER PRESTIGE, FIRST GLASS, Smart Films, ads, AODOTH, SOLARTEK GLASS FILM SPECIALISTS, SWITCHABLE SMART FILMS, FILMBASE MAKE GLASS DO MORE, SourceGlass

- ✕ Requires an expert to install it
- ✕ Very expensive
- ✕ Difficult to use

Sleep-masks & Earplugs

myhalos., Therabody, loop earplugs, ALASKA BEAR, Snooze, snooze THERAPY, MACK'S, HYPNOS, noctura 400

- ✕ Light and noise can still sneak in
- ✕ Uncomfortable to sleep in
- ✕ Quick wear

What have they tried?

Additional Statistics

Sleep statistics

Even one night of short deep sleep can **double the rate of an injury**

Poor sleep costs the **UK £30–40 billion a year** in lost productivity

Around **1 in 3 adults in the UK are affected by insomnia**

1 in 8 people in Britain have trouble falling asleep every night

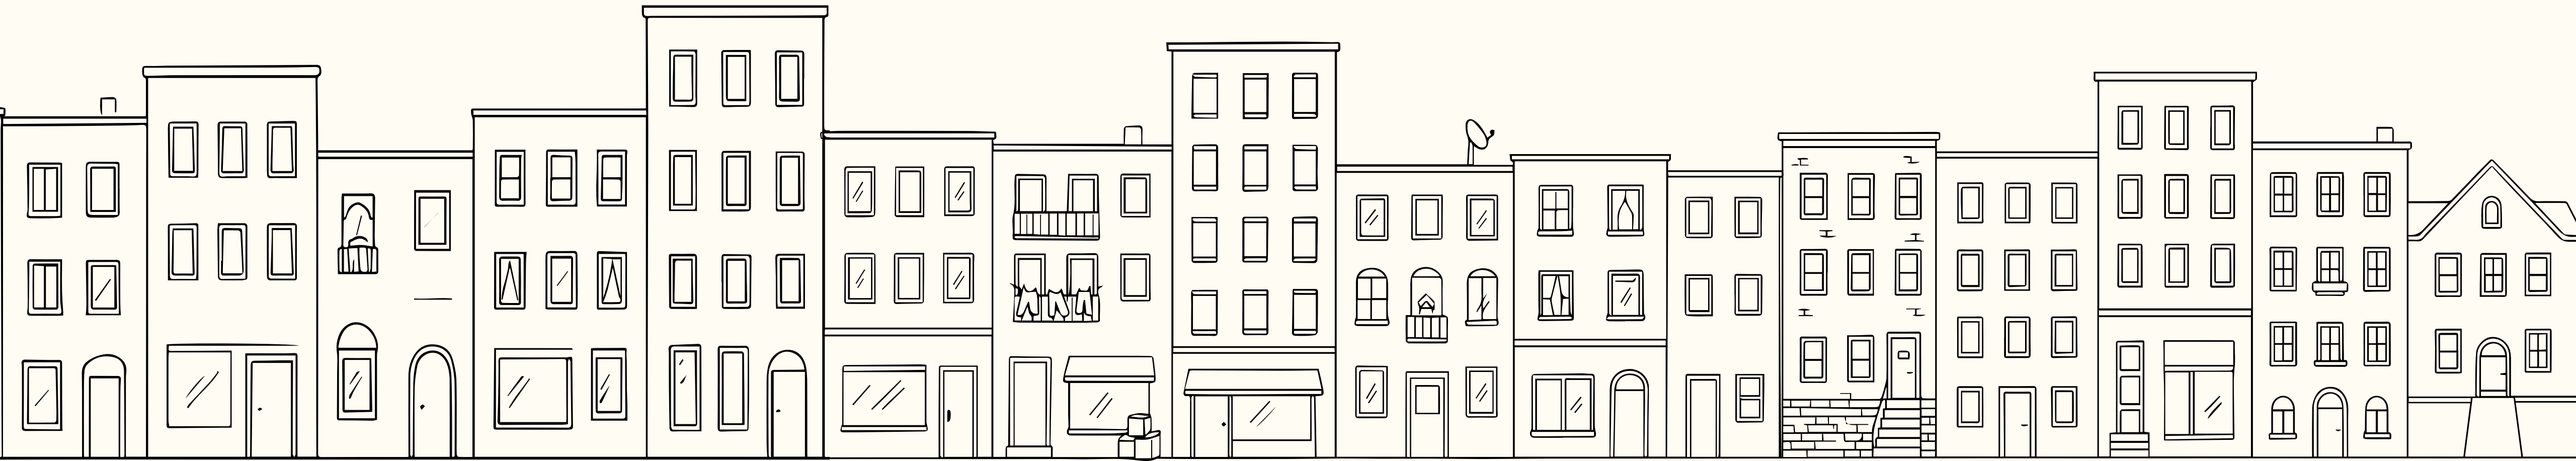
1 in 8 people also reported having less then 6 hours of sleep

24% take sleeping tablets to help them fall asleep

Light and noise pollution

WHO & European agencies rank environmental noise as the most harmful environmental stressors after air pollution, driving chronic sleep loss and cardio-mental health risks.

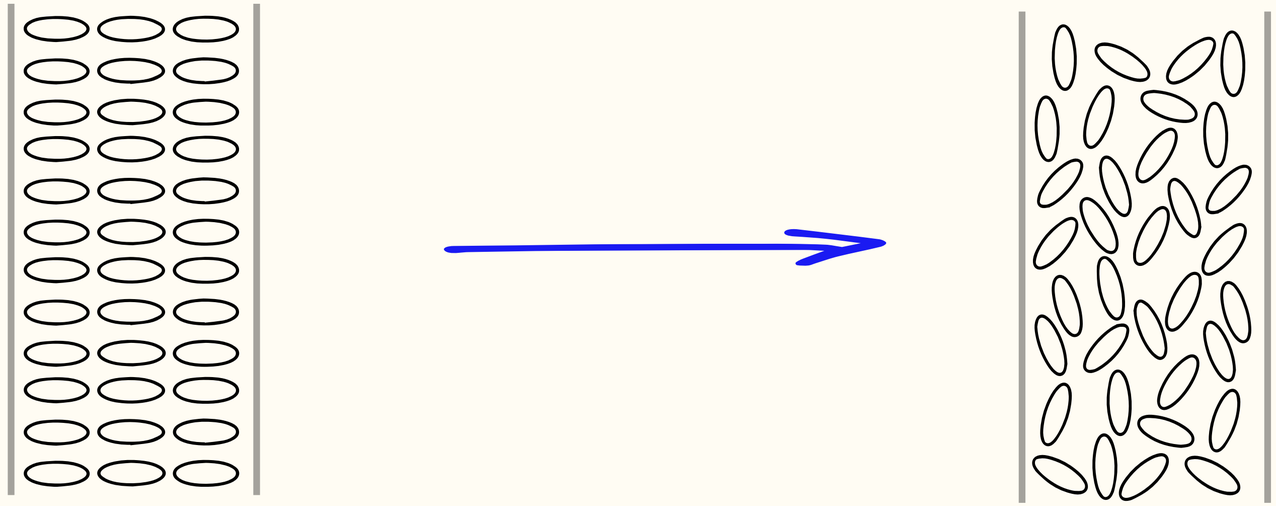
72% of respondents live in rented accommodations



Technology

EC Film, how it works

We use an **electrochromic film** to change the windows opacity



- A thin layer that can switch between clear and opaque.
- When power is applied to it it can change opacity from completely clear to 99% blackout.
- Has a zero power idle so no energy is needed to keep it in current state.
- A small battery bank can power window for 100 days on single charge depending on the size of the window.

Battery life calculations

- Our EC film power consumption - 1W per m^2
- Window size - $1m^2$ (larger than uk average of $0.7m^2$
- Switching time - 10 seconds
- Battery Voltage - 3.7V
- Switches per day - 20
- battery size - 2000 mAh

1. Power = $1W/m^2 \times 1m^2$ = 1Watt
2. Energy to switch = $P \times t = 1W \times 10s$ = 10 Joules
3. Energy to switch in Wh = $10/3600 \approx 0.0028$ Watt-hours
4. Daily energy usage = $20 \times 0.0028 \approx 0.056$ Watt-hours per day
5. Battery Energy ≈ 2.0 Ah $\times$ 3.7 V $\times$ 0.8 $\approx$ 5.9 Watt-hours
6. Battery life - $5.9 / 0.056 \approx 107$ days

Market

Market Sizing

UK

Our estimates:
- 28M households
- 70% sleep under urban/suburban light pollution
  - **20M households** available
- An average of **2 relevant windows** per household with a cost of **80£ per window**
- 20% of households are smart-home adopters
- Assumed market penetration (Y1-Y3) of 1%

TAM:
2 (Windows) * 20M (Relevant Households) *80£ (Per Window) = £ 3.2B

SAM
£3.2B (TAM) * 20% (Smart Home Adopters) = £640M

SOM
£640M (SAM) * 1% (Market Penetration (Y1-3)) = £6.4M

Worldwide

Our estimates (high income countries):
- 400M households
- 70% sleep under urban/suburban light pollution
  - **280M households** available
- An average of **2 relevant windows** per household cost of **80£ per window**
- 20% of households are smart-home adopters
- Assumed low-level market penetration (Y1-3) of 0.8%

TAM:
2 (Windows) * 280M (Relevant Households) *80£ (Per Window) = £ 44.8B

SAM:
£ 44.8B (TAM) * 20% (Smart Home Adopters) = £ 9B

SOM:
£ 9B (SAM) * 0.8% (Market Penetration (Y1-3)) = £ 7.2B

CAGR: 5.91% based on Global Sleep Market

Market Sizing - Renters

TAM (UK Renters)
All UK rental households
↠ 8.8 million households
If all bought 2-window blackout film (~£160):
↠ **£1.4B TAM**

SAM (Urban Renters)
Renters specifically in cities with light/noise pollution
(62% of renters live in high-density urban areas)
↠ ~5.4 million households
5.4M × £160
↠ **£864M SAM**

SOM (Initial target: young urban renters 22–35)
Roughly 1.5 million UK renters in this age bracket
Expected early adoption (8–12%) = 150K users
150K × £160
↠ **£24M SOM**

Market Sizing - Parents

TAM (UK households with children under 5)
ONS: ~4 million families with young children
Assume 80% have a room affected by light
↠ 3.2 million
3.2M × £160
↠ **£512M TAM**

SAM (Parents actively seeking blackout/nap solutions)
Products like blackout blinds, SnoozeShade etc. indicate ~40% active need
3.2M × 40% = 1.28M households
1.28M × £160
↠ **£205M SAM**

SOM (Parents who buy early sleep-tech / early adopters)
Take 5–8% early adoption
1.28M × 7% ≈ 90K households
90K × £160
↠ **£14.4M SOM**

Market Sizing - Night shift

TAM (UK night-shift workers)
UK: 3 million people work regular night shifts
Equivalent to ~2 million households
2M × £160
↠ **£320M TAM**

SAM (Night-shift workers reporting sleep problems)
Studies suggest 65–70% have daytime sleep disruption
2M × 70% = 1.4M households
1.4M × £160
↠ **£224M SAM**

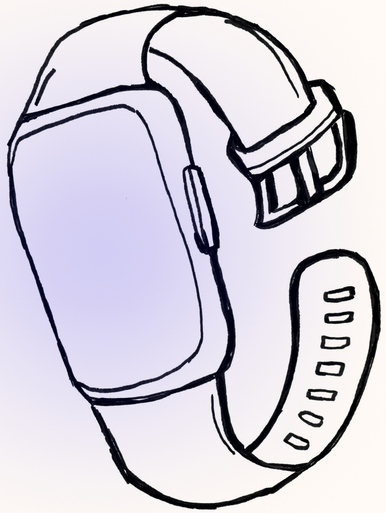
SOM (High-sensitivity early adopters)
Assume 10% early adoption due to severe need
1.4M × 10% = 140K households
140K × £160
↠ **£22.4M SOM**

Market Sizing - Wellbeing

TAM (UK wellness market segment)
UK wellness consumers ~10.6 million adults spend on wellness products
Assume 15% are specifically sleep / environment optimisers
↠ ~1.6 million households
1.6M × £160
↠ **£256M TAM**

SAM (Sleep-optimisers specifically)
Industry data: ~30% of wellness spenders buy sleep-adjacent tech
1.6M × 30% = 480K households
480K × £160
↠ **£76.8M SAM**

SOM (Quantified-self / tech-adopting early market)
Take 10% early adoption
480K × 10% = 48K households
48K × £160
↠ **£7.6M SOM**



COGS

Film cost:
Film/m^2 = £12

Controller cost:
USB-C Cable = £0.60
Battery + PCM = £1.50
USB-C Port + Regulator = £0.60

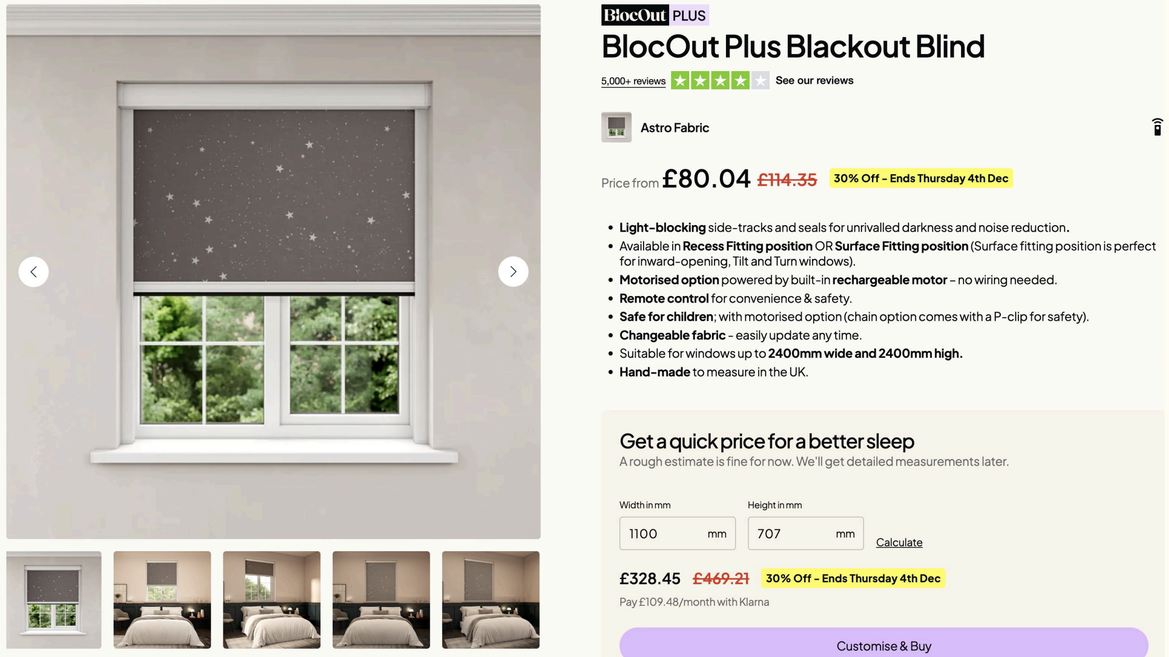
Competitor Research

Black out curtains and No-drill curtains

BlocOut Black out curtains

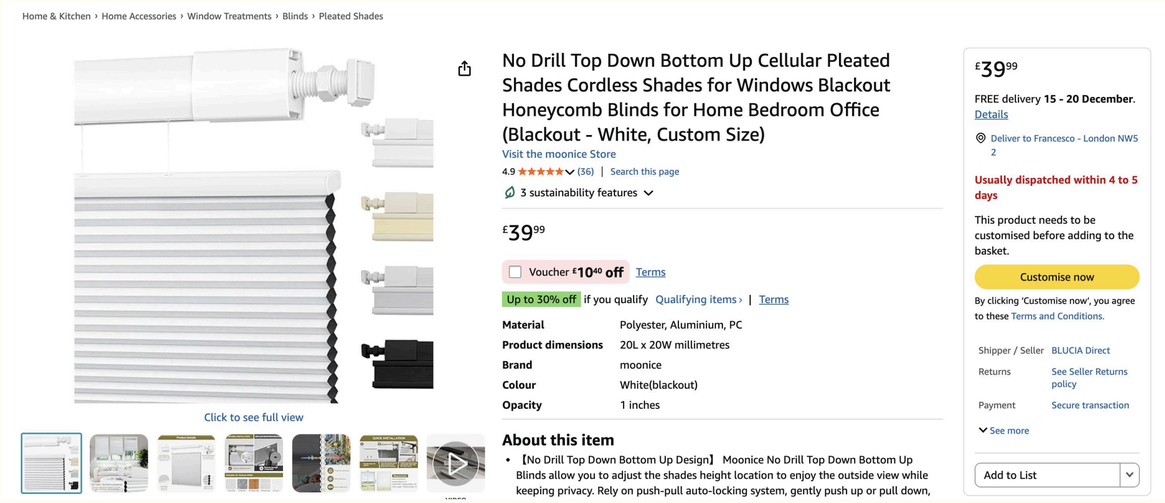
BlocOut curtains are able to completely block out any light coming from the windows by sealing all edges with a custom frame.



Issues with them include that for a comparably sized window, they are about **3 times as expensive**. They cannot work for large or **non square** window panes. They require either a recess or flat wall next to the window. They damage the wall as the frame is drilled in.
https://blocout.com/products/blocout-plus-blackout-blind

moonice No drill blinds

No drill blinds offer a solution for renters who **cannot permanently fix** anything to walls by pushing against the wall edges by the frame.

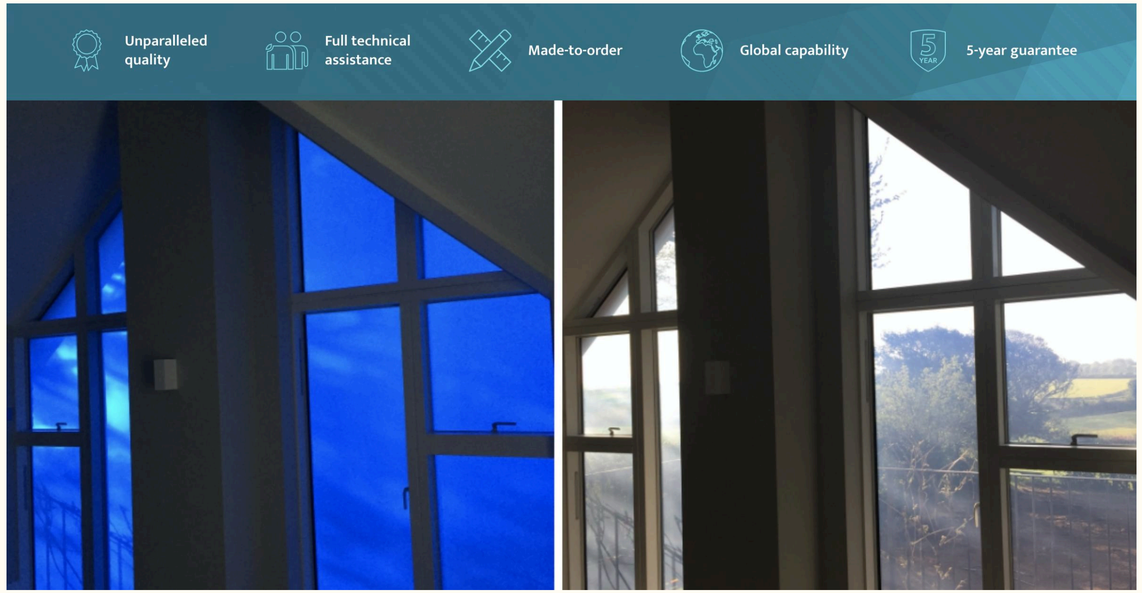


Issues with them include that they are very difficult to put up and will struggle to stay on. While they require no drilling, they can still damage the paint next to the window. They also cannot fit all window shapes or dimensions, so windows which are too large or round will not work. Looks. Finally, they will not block all light and will let in a lot of it.
https://www.amazon.co.uk/Moonice-Cellular-Cordless-Blackout-Honeycomb/dp/B0D3KVS2W2

Our closest competitor and other film manufacturers

smartglass Closest rival

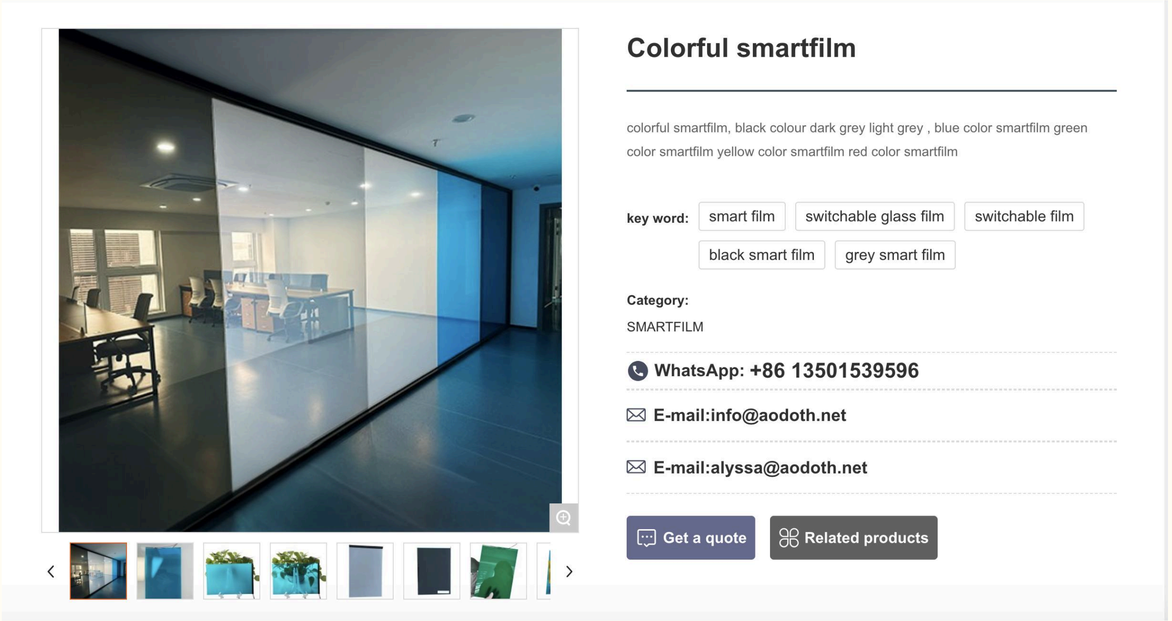
Blackout Smart Glass is able to block 99.4% of visible light and 100% of UV light. Uses a dual layer technology within the glass made of both SPD film and PDLC film.



Issues with them is that they manufacture the glass themselves and it has to be installed by an expert. They are also very expensive due to high manufacturing and installation costs. Lastly, they use a large amount of power, requiring 110V at 14 W/m^2.
https://www.smartglassinternational.com/blackout-smartglass/

AODOTH Pre-made EC

Pre-made EC cannot be bought on Amazon but only directly from suppliers.

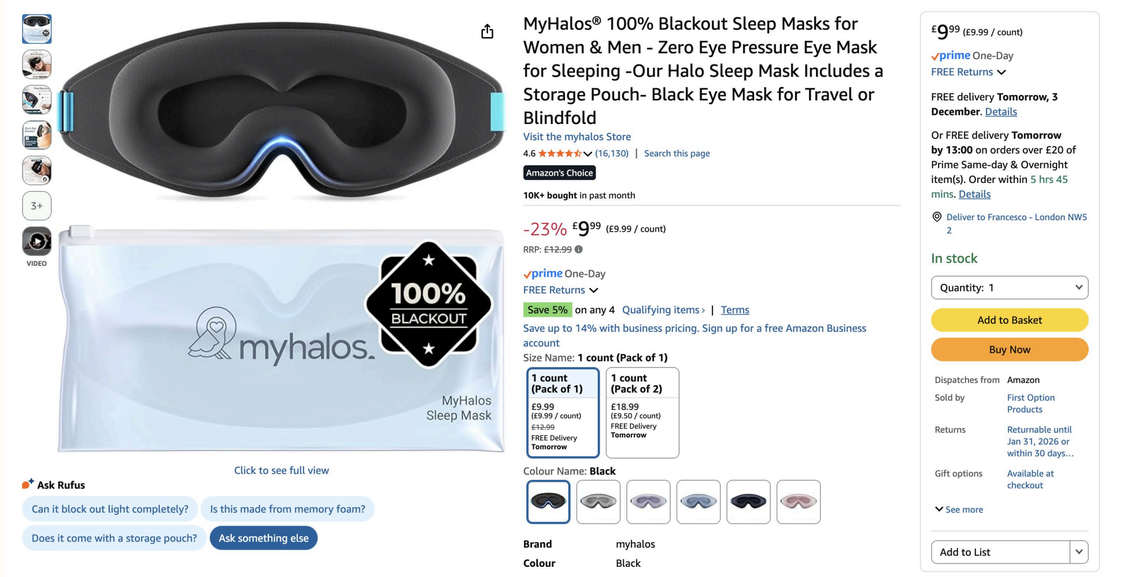


As such, the average consumer would be unable to buy and use it at home as they would need to get into a manufacturing contact with the factory that builds it.
https://www.aodoth.net/products_details/17.html

Sleep-mask and earplugs

myhalos™ Top selling

MyHalos is one of the top selling sleep masks on amazon due to it's low price and apparent comfort.



However, users had quite a few issues with it including light and noise still seeping in, especially around the noise bridge. Uncomfortableness, especially for side sleepers. Low quality materials resulting in quick wear of the product.
https://blocout.com/products/blocout-plus-blackout-blind

loop earplugs Loop Dream

Loop Dream earplugs have been specifically made to ensure sleep comfort. They are made of soft silicone to help with that.

Some users still say they are too uncomfortable to wear, especially for long periods. Multiple people also had issues with them falling out. Some said they didn't block enough noise. And finally maybe compared them to normal earplugs even though they cost more then 50 times as much.
https://www.amazon.co.uk/Loop-Dream-Comfortable-Customized-Reduction/dp/B0FBMJY4W4
